## Summarize

## Safety precaution

Please abide by the warning and the relevant safety tips.

Please take this manual in convenient place after you reading the guide for future reference.

### Warning

The sign means there is potential safety hazard, when operate wrong may result in death or serious

injury.

The sign is used to remind the user that attached is the important operation and maintenance data.

#### Setting and Installation

(1) Avoid being wet with the water.

Don't make the machine or exposed to rain water or other liquid contamination of the environment, or lead to fire or get an electric shock.

(2) Don't use unspecified voltage.

Using the marked voltage on the machine.

Using more than the logo of voltage could lead to fire or shock.

(3) Don't scratch the power cord.

Don't scratch the power cord or cut it.

Simultaneous, keep the power line far way from heated objects, put heavy things on it will lead to fires or electric shock.

#### Using machine

(1) In case of the anomalies

Please turn off the power supply immediately when finding the abnormal phenomena, please connect with the agency if you continue to use, it will likely fires or shock.

•The smoke or odor of the machine.

•The inside of the machine is flooded by water or foreign bodies intrusion.

Machine falling or machine shell damage.

·The power cord damage(wire core is exposed of broken, etc)

- ·Fault(eg: it can't network, no sound ..etc)
- (2) Don't open the machine internal or modify the machine

Do not let foreign matters invade the machines internal.

Don't let the metal items or inflammable objects inserting machine such as foreign inserting machines or throw into the vents machines internal, otherwise will likely cause fires or electric shock.

(3) Please do not touch it when thundering

To avoid electric shock, please do not touch the machine and the plug when lightning, etc.

(4) Please do not place containers with liquid or small metal objects on machine above

If gets upset containers, and let the fluid inflow to the machine that will likely fires or cause shock.

(5) Do not open the machine internal or modify the machine

The machine internal contains high voltage parts, once open the cover or modify the machine, it will likely fires or cause shock. All the maintenance and other machine modification should be operated by professional personnel.

 $(\mathbf{6})$  Maintenance and the precautions for not using in a long time

While maintenance, if the machine is not using for 10 days or more, please shut off power supply switch for safety. If do not comply with this provision, it will likely cause electric shock or fires.

## **Product Introduction**

Network audio terminal built-in independent intellectual property rights IP Audio digital network technology. It's equipped with power input interface, alarm input, audio input/ output port, network input interface, alarm input/output interface.

- Adopt high speed industrial grade dual-core chip, starting time ≤1 second.
- MP3、WAV audio decode.
- 1 analog audio input/output interface.
- Support 2.4G wireless module work with 2.4G wireless microphone (optional)
- Offer 2\*10W and 2\*30W power for selection.
- Standard RJ45 network interface, it can access any Ethernet, support across the network segment and route.

## Hardware Interface description

### Side

①Amplifier output interface: Internal power amplifier output port, it offer two way power amplifier output, it can output from amplifier when the terminal is receiving broadcasting or playing the background music. When the terminal power is 20W, amplifier output 2\*10W; when the power is 60W, amplifier output 2\*30W.

②Alarm input/output interface: G-A: alarm input interface, O-1: alarm output interface.

③The volume adjustment knob: used for line input volume adjustment, clockwise for up, anticlockwise for down.

4 Forced upgrade or play device IP button

When the terminal without power on, press ④ button by tweezers or pin, then power on till 5 seconds, so that it will enter into upgrade status (press this button can voice play the terminal IP and subnet mask information in free status).

⑤Line input interface: it can connect the external analog sound source (eg: dynamic microphone, computer...etc) to this port.

<sup>(6)</sup>Line output interface: this port output the restored audio signal; It can used as a sound source access to the active speakers, audio pre-amplifier, sound console, audio amplifier device...etc.

⑦Network interface: this port connect with Ethernet by cables.

⑧STATE: status light

If the terminal is upgrading firmware, the status light is flashing in red and green; If the terminal is not login or required to login, the status light is flashing in red.

If the terminal logined server and in free status, the status light is normal green on; If the terminal logined server and is executing the task, the status light is flashing in green.

(9) The power interface: connect 24V power DC power supply.

①ANT: antenna interface

## Introduction

## **Packing list**

Network audio terminal is including the following accessories, please check it before installation, please contact the supplier if any missing.

(1). Network audio terminal 1pcs

(2).DC24V/1A Power adapter (for 20W terminal only) 1pcs

(3). DC24V/2.7A Power adapter (for 60W terminal only) 1pcs

(4). Cup head tapping screw (M4\*25) 4pcs

(5). Plastic swelling cover (F7) 4pcs

(7). Antenna 1pcs (for 2.4G wireless module terminal only)

(8). Installation manual 1pcs

(9) Certification 1pcs

## Wiring

- (1) **O O**Amplifier output port, it can connect with the constant resistance loudspeaker, constant resistance horn ...etc.
- (2) A-G alarm input interface, it can connect with the alarm button or other signal.
- (3) O-1alarm output interface, it can connect with electrical door lock.
- (4) Line input interface can connect with dynamic microphone, computer, DVD ...etc.
- (5) Line output interface can connect with active loudspeaker, audio power amplifier ...etc.
- (6) Terminal "LAN" interface can connect with switcher network output port.
- (7) Connect the power adapter one end to the Network audio terminal DC24 port, and the another end connect to the power plug.

# Note:

1、Two loudspeakers power should be same.

2、20W series Network audio terminal should connect with two 10W loudspeakers, 60W series terminal connect with two 30W loudspeakers.

### **Basic Network Setting**

Connect the cable and power on as per the installation manual, then revise the terminal network parameters acc ording to the live environment.

There have below two methods:

#### **Terminal Equipment Scanning Tools**

(1) From [CD: \ tools \] directory to find and run "IP configuration tool" audio terminal, after start it , please enter the default password "123456".

🕙 DevConfigTool. exe >
过 DevConfigTool-Help.mht
🣴 DeviceConfig. ini

(2) From the right menu choose [Mandatory configuration], then fill the correct parameters in the [terminal parameters], click "send parameters" button to complete the IP parameters Settings.

Scan config Mandatory config		
Note: All terminals support, used with caution. Warning: 1. Make use of interconnection net cable; 2. When using net switch, only connect one terminal;		
Terminal parameter		
Terminal ID: 1		
Server IP: 192 . 168 . 0 . 192		
Terminal IP: 192 . 168 . 0 . 101		
Gateway IP: 192 . 168 . 0 . 1		
Subnet Mask: 255 . 255 . 0		
Terminal Port: 2046 (Default 2046) (special modify)		
Server Port: 2048 (Default 2048) (special modify)		
Send parameters		
☑ Safety checks (Check more than one terminal)		

#### Note:

1. Please use the administrator mode to run and close the firewall or other related software when using the Windo ws7 operating system;

2. Terminal equipment scanning tools can only configure one terminal at one time. Please make sure that a comp uter only connect one target terminal when using this method.

#### Web page Mode

Enter into the Network audio terminal web interface and revise the terminal parameters according to the environment, click "save" after setting completed.

Please refer to the user-define terminal parameters setting for more details.

## **User-define terminal parameters**

#### Login Web Interface

(1)Please input the Network audio terminal IP address in the browser (the factory default IP address is 192.168.1.101), it will auto-play the IP address when the press the force button), then enter.

(2)Enter the user name and password in the web page (the default user name and password is admin)

Login safely rec password.	quest username and
User name:	admin
Password:	••••

(3) Click OK to enter terminal web page.

Olubus			
Basic Settings	Status

		Save Default

Coding mode	Intercom or broadcasting coding, PCM means uncompressed data,		
	ADPCM means compressed data(small network data)		
Line input volume	The line input volume		
Line input sound source	Terminal input sound resource (microphone, line input)		
Intercom sampling rate	The terminal talking sampling frequency (8000 Hz, 22050 Hz)		
	The terminal output total volume within the conversation(0~15, 6 grade		
	is 5dB)		
Broadcast sampling rate	The terminal broadcasting sampling frequency (8000 Hz, 22050 Hz)		
Broadcast output volume	The terminal output total volume within the broadcasting(0~15, 6 grade		
Bioaucasi ouiput volume	is 5dB)		
	It can select local and network priority, the default is network priority.		
Audio priority	Network priority: network broadcasting>PTT broadcasting>line input;		
	Local priority: line input>network broadcasting>PTT broadcasting		

### Audio auto-detect function

In order to avoid line noise and sound resource noise output from the loudspeaker, when line input audio range less than a specific value (Line input threshold), the amplifier will be closed with 1 min. Line input thresholds can be set from audio parameters in web page, grade one is lowest audio range and the highest is grade five.

#### Wireless amplification sampling rate (2.4G wireless module is available)

It can select different wireless amplification sampling rate in Web page audio parameters, select the far distance can acquire further transmission distance, select high quality can acquire higher tone quality, the distance is relatively shorter.

### **Password Setting**

You can revise the web page logining account and password in the WEB management parameters.

Note: All the parameters modification in web page will be effective after restart the device.

## **Reset to defaults**

Status Basic Settings Network Audio	Restore
Advanced Settings Web Management Maintenance System Tools - Reboot - Reboot - Upgrade - System log	Click the Restore Factory Settings button, the device will return Restore factory settings

Reset to defaults: all the parameters reset to the defaults.

## Update Firmware (Note: It shouldn't update unless there is a special requirements )

Visit the terminal Web pages from Web browser, click the "device maintenance" -> "system tools" -> "firmware upgrade", click "enter the firmware upgrade mode" button to enter the firmware update WEB page ,then choose the factory offered firmware update file , click "firmware upgrade" button to upgrade.

Status Basic Settings Network	Upgrade Upgrade	
Audio Advanced Settings Web Management Maintenance System Tools	Firmware Version: BIOS Version:	Firmware_[normal]_V2.2_150720 BootLdr_[normal]_V5.0_150625
- Reboot - Restore - Upgrade - System log		Enters firmware upgrade mode

# **Basic Function**

## **Offline broadcasting**

Network audio terminal can receive the offline broadcasting which is initiated by other terminals.

### **Real-time broadcasting**

Open the server software, select the target zone in "target area" terminal choice box; Open WAV or MP3 format audio documents, click :start broadcasting" button, terminal loudspeaker will output the audio documents when server software in broadcasting.

Remark: please refer to the server software manual for specific operation.

#### Receive terminal broadcasting, server task

Under server authorization:

Terminal can receive server Wav, MP3 format timing program, timing broadcasting, timing ringing, document broadcasting, fire alarm...etc, it also can receive the broadcasting from other terminals.

Remark: The broadcasting output volume can be set from Web page audio parameters.

# Fault Exclude

#### Why the terminal cannot login the server?

1. Check the software server and the main controller is normal opened or not. It's required to close all firewall before open the software server (including system built-in firewall and other antivirus software firewall).

2.Check the network connection is normal or not. After the terminal powered on, the network port green light is norm on, meantime the orange light will be short and fast flash, it means the network cable hard-connected normal. If the network port green light is not on, it means the network hard-connected problem, please check the terminal network cable and switcher whether they work normal, damaged and disconnect or not etc.

3. Check the terminal IP setting. Please check the terminal ID, sever IP, local IP, gateway IP ... etc parameters.

#### Why it appears "terminal network services (UDP) start fail" warning within the process of start server software?

Appearing this warning information, it's usually the local network connection has been disconnected, please connect the local network cable well and exit the software, then restart it.

#### Why web show abnormal?

Please clear the caches or change the browser.

#### How to change the web login account and password?

- 1 .Click the password setting in webpage .
- 2. Input the old account and old pass word.
- 3. Input the new account and new pass word.
- 4. Input the new password again for confirmation
- 5.Click save .

The new account and new password will be effective after reboot.

# **Copyright Announcement**

#### Copyright

The copyright is reserved of the SPON Communication Technology Co., LTD (abbreviation SPON), if without the permission of the company in written form, any company and personage shall not arbitrarily excerpt, copy mentioned file information, and shall not spread in any forms.

According to the legal provisions, copy including translate to other language or switch to other format. Mentioned document spreading in network media, SPON allow download and print for personal uses. Any parts of the document can not be modified and for commercial uses.
