

XC-9607

IP WALL-MOUNTED SPEAKER

MAIN FUNCTIONS

Basic functions

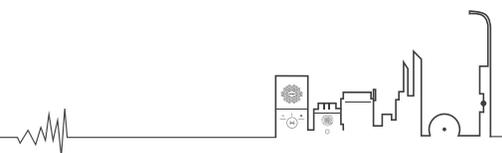

- Receive broadcast: receive the broadcast initiated from other terminal station or server.
- Modify the parameters (audio parameters, network parameters, or login password, and so on) via WEB to realize personalized settings.
- Power supply via POE (POE over Ethernet)-only one Ethernet cable required.
- SIP protocol.
- Each loudspeaker can be addressed and configured individually.
- End-to-end monitoring of connection and loudspeaker functionality.
- High volume capacity and superior speech quality thanks to the integrated 15 watts class-D amplifier and eHD voice.
- No need for central amplifiers to realize small-sized and remote PA zones.
- Loudspeaker can be allocated to groups and zones

Audio functions

- Amplifier output: amplifier output port, can be external 10W deputy speaker.
- IVC (Intelligent Volume Control): automatically adjust the volume setting to the ambient noise level.
- Scheduled program broadcasting: uploading the audio resource needed to be played for every day to the server, and making the plan for broadcasting task. IP Wall-Mounted Speaker can play the planned task automatically which is settings by server.

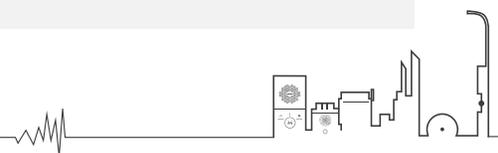

Additional functions

Loop detection: with self-inspection function, and the working status can be detected.

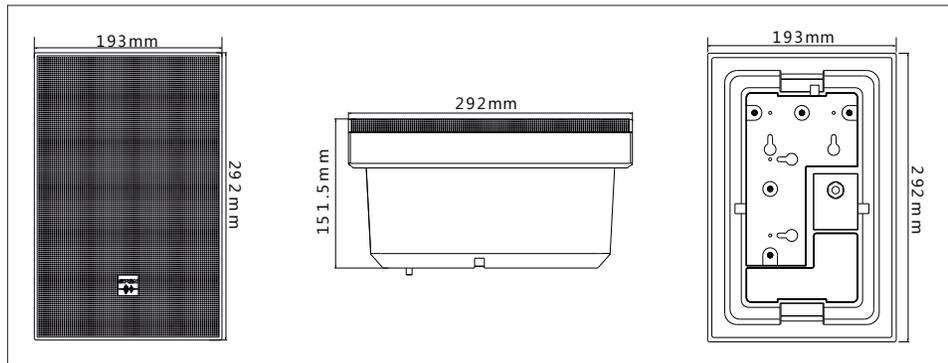

SPECIFICATIONS

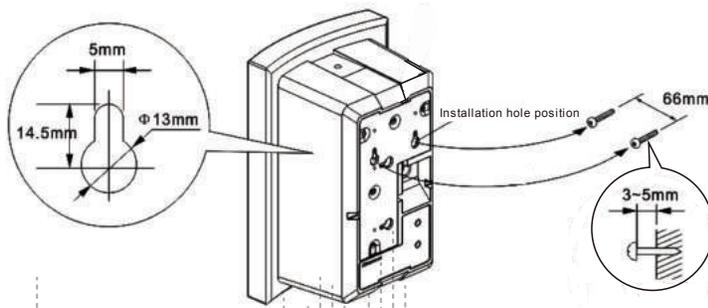

XC-9607		
Audio	Audio streaming	One-way/two way, mono
	Audio compression	G.711a, G.711u, PCM, MP3
	Audio input	Built-in MIC
	Built-in MIC	Frequency response 20Hz-20KHz, dB-45dB
Speaker	Speaker component	Constant resistance 8 Ω
	Speaker component	Treble speaker 1 inch, bass speaker 4.5 inches
	MAX SPL	90dB \pm 3dB
	Frequency response	100Hz~18KHz
	Sensibility	88dB \pm 3dB/W/M
Amplifier	Built-in amplifier	Class D amplifier
Network	Transmission network	10/100M self-adaptioncontrol
	Security	Password protection, IP address filtering, 802.1x network access control
	Supported protocols	IPv4/v6c, HTTP, RTP, TCP, UDP, IGMP, ARP, SIP
System integration	Voice announcement	Voice announcement through built in SIP support for connect to any IP telephone/ VoIP system
	VoIP	Support for SIP protocol to realize network transmission of audio and PBX
	Intelligent detection (DC/POE)Output power	MIC self-detect (via built-in MIC) 15W
	Event actions	It can be realized the broadcast, alarm, and other functions with XC-9000 software.
	General	Shell color
Shell material		Plastic
Grille material		Metal
Grille surface treatment		Spraying
Memory		RAM 128M
Power		24V/1A or POE (IEEE 802.3af)
Interface		RJ45 support for POE (IEEE 802.3af)
Reliability		Designed for 24/7 operation
Operating conditions		-20°C to 50°C (4°F to 122°F) Humidity <90% RH (no condensing)
Storage conditions		-40 °C to 65 °C (-40 °F to 149 °F)
Approvals		CE、3C
Dimensions		193 x 151.5 x 292mm (7.60 x 5.96 x 11.50 in)
Weight		2.4KG
Included accessories		Stainless steel screw (M8*12) with spacer 2 PCS, wiring terminal (3.81-2P) 1 PCS, wiring terminal (3.5-4P) 4 PCS, waterproof connector 1 set, bracket 1 PCS, installation manual 1 PCS, certificate and warranty card 1 PCS.
Optional accessories		24V/1A power adaptor 1 \uparrow PCS
Software	/	
Languages	Simplified Chinese, English	
Warranty	3 years	

INSTALLATION

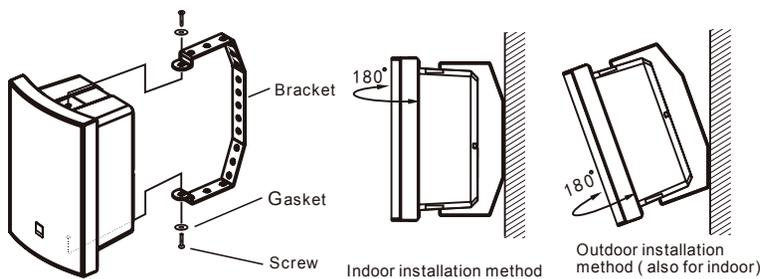

Installation mode 1: indoor wall-mounted

1. Fix the screws to the wall according to the mounting hole, 3 to 5 mm for reserved.
2. The speaker hole should align with the screws to make fixing.

Note: the speaker can be horizontal and vertical installation. The distance of the mounting hole will be 77mm during horizontal installation.

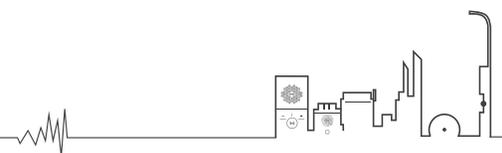

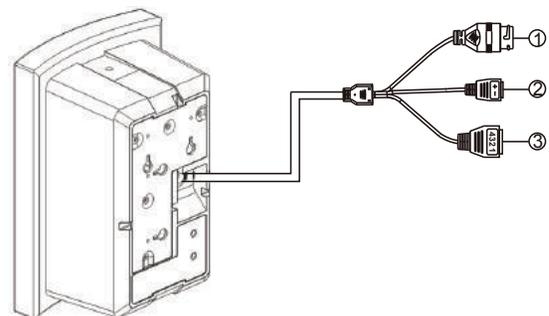

Installation mode 2: bracket installation

1. Fix the bracket to the wall.
2. Fix the speaker to the bracket by gaskets and screws.

Note: the bracket should be suitable for horizontal installation. For reaching to the fantastic broadcasting effect, please loosen the screws to adjust the speaker in a suitable position (Note: the speaker can be rotation in 180 degrees)

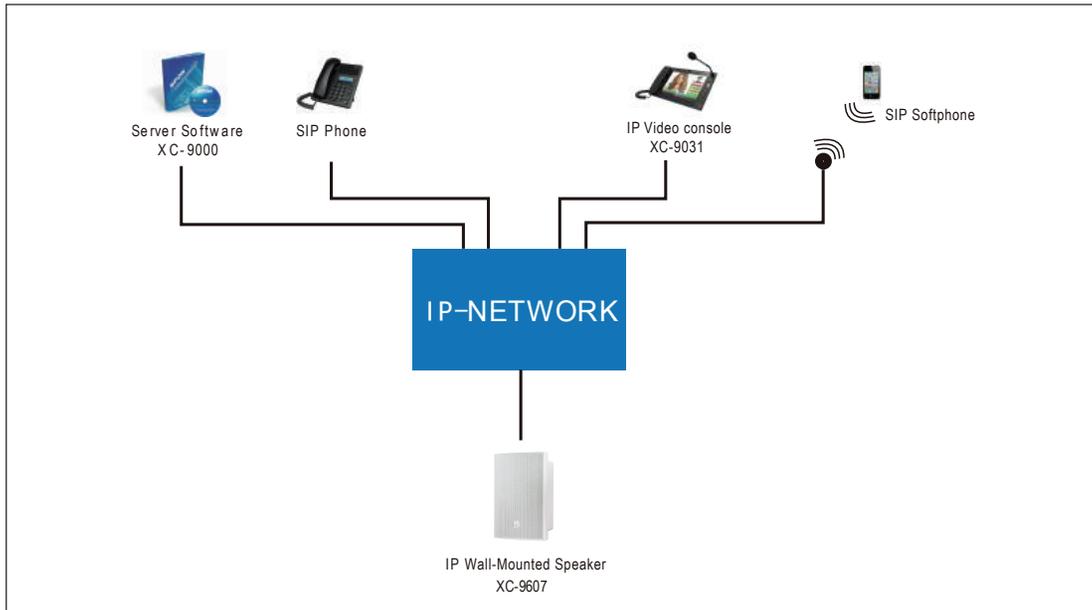

- ① Network interface: connect with network switcher or POE switcher via network cable.
- ② Power interface: DC24V/1A (POE supply, and it needn't to connect with the power if connected with POE switcher already).
- ③ Amplifier output port (Note: port 1 and 2 is for amplifier output, port 3 and 4 port is for reserved.)

APPLICATION

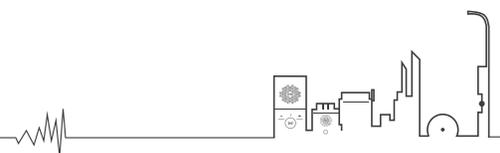

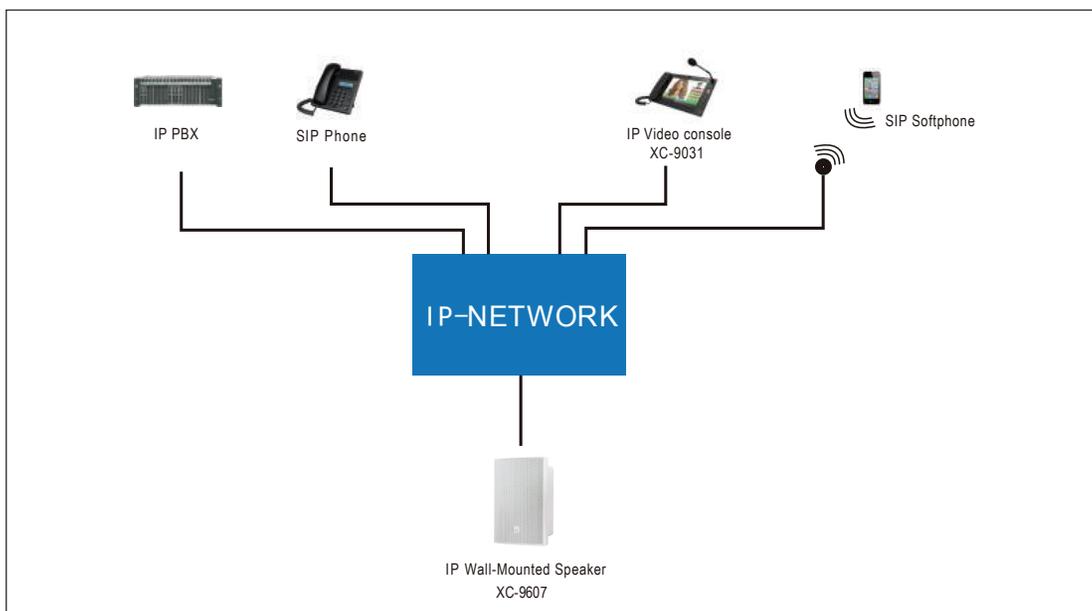

Application 1

IP Wall-Mounted Speaker is work with with SPON XCoIP protocol, and it will be ok for SIP phone to make broadcasting to one or more IP Wall-Mounted Speaker.

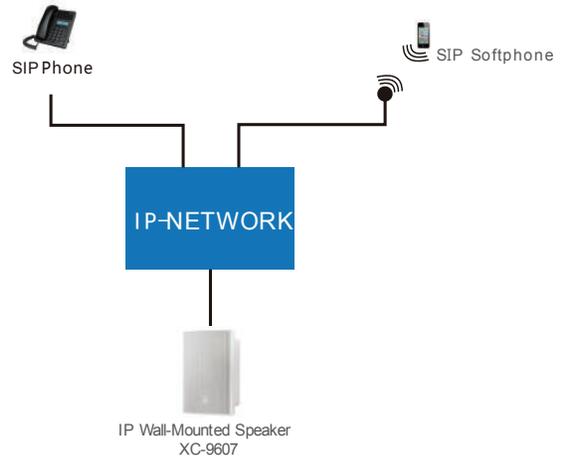

Application 2

IP Wall-Mounted Speaker is work with standard SIP protocol, and it will be ok for registering to the mainstream IP-PBX and receiving SIP calls or initiating the broadcast.

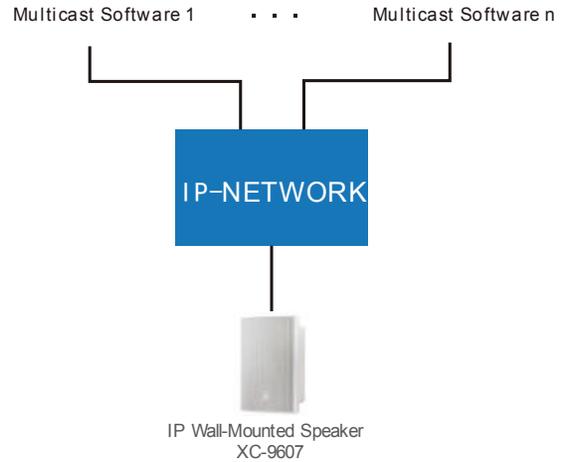

Application 3

Without the SIP PA server, the IP Wall-Mounted Speaker initiate broadcasting through receiving SIP calls or SIP soft calls to dialing IP address or multicast address.

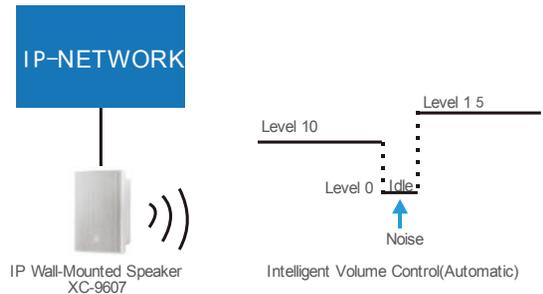

Application 4

IP Wall-Mounted Speaker work with multicast and different priority levels. It will be ok for multicast software broadcasting audio files to one and more than one of IP Wall-Mounted speakers, and high-priority multicast address broadcasting can end low-priority multicast address broadcasting.

Application 5

IP Wall-Mounted Speaker has environmental noise monitoring function, and it can automatically adjust the volume according to the site environmental noise to ensure the clear and recognizable voice in any time.
